Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-54 are rejected under 35 U.S.C. 103(a) as being unpatentable over Campillo et al in view of any one of O'Neill, Kirkpatrick, or Bannasch et al.

Campillo et al disclose a countermeasure missile defense system comprising substantially all claimed steps or elements, including a dispenser to dispense a substance (i.e. an aerosol or particles) into an attack envelope, a laser to illuminate the substance with a first frequency and cause the substance to radiate at a second frequency, and means for the detection of an attack and the control of the defense system. See especially column 2, line 61 – column 4, line 49. Campillo et al fail to show the defense system being used to defend an aircraft. O'Neill, Kirkpatrick, and Bannasch et al each teach that it is well known to use infrared defense systems to protect aircraft from missile attack. Motivation to combine is the mere substitution of the system from the defense of one type of target to the defense of another known type of target. To employ the teachings of O'Neill, Kirkpatrick, or Bannasch et al on the defense system of Campillo et al and have the system defend an aircraft is considered to have been obvious to one having ordinary skill in the art.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bushman and Roberts et al are cited as being of interest since they disclose radiation control systems.
